

Making import export easy

navaro.co.in

The opportunity no one is talking about

The world's fifth largest economy is sitting on an underutilised trade engine.

1.36%

of India's MSMEs currently
export

\$1 Tn

merchandise export target by
2030

Rs. 20,000 Cr

committed to PLI export
manufacturing

China+1

opportunity India is not yet able
to utilise

The question is: will India become the world's manufacturing powerhouse?

The last decade changed everything

"The last decade has taught us more about import export than any other time period combined."

Logistics used to be invisible. A back office function handled by big companies with warehouses and freight departments.

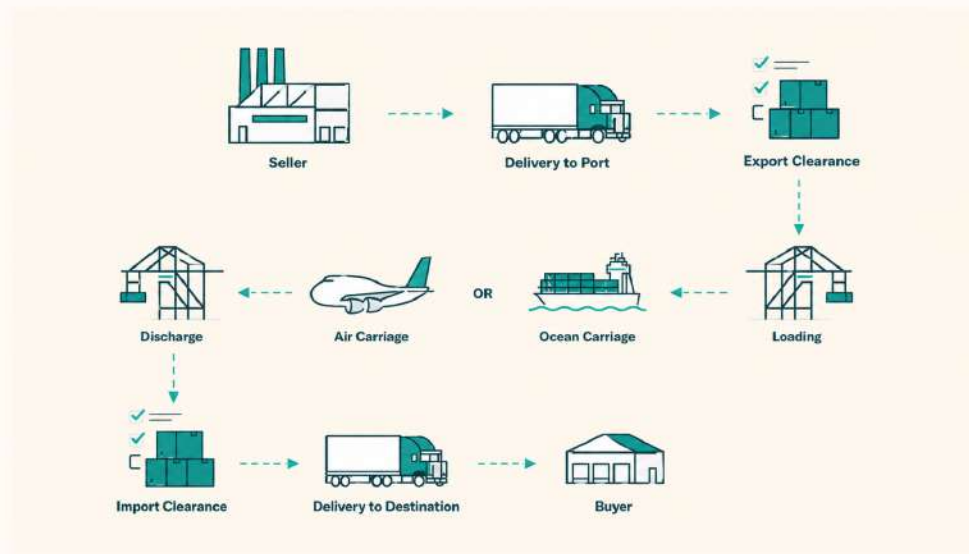

Then came 2020.

COVID shut borders. Freight rates exploded. Ships sat idle outside ports. For the first time the world realised global trade is not background noise. It is the signal.

India's EXIM activity did not collapse. It adapted. Trade kept moving because trade had no choice. There was no recession in this sector.

The lifecycle of every shipment

Every shipment follows the same eight stages. Knowing them means knowing where to pay attention.

NAVARO TIP

Most delays happen at stages 3, 7 and 8. Get your documents right before goods reach the port.

TYPES OF SHIPMENTS

Choose the right mode

Ocean freight is a fraction of the cost of air, but far less fast. Match the mode to the cargo.

Ocean LCL

Less than container load

TYPICAL TRANSIT

20 to 45 days

- Less expensive than FCL or air
- Ship smaller quantities without waiting for full container volume
- Cargo can move to different warehouses

BEST FOR

Small samples and first orders that do not fill a container.

Ocean FCL

Full container load

TYPICAL TRANSIT

20 to 45 days

- Direct voyages, no consolidation
- 20ft, 40ft, 40ft HC, 45ft plus reefer and open top
- Reliable schedules, fewer handoffs, less damage risk

BEST FOR

Bulk non-perishable goods and repeat importers.

Air freight

Fastest mode available

TYPICAL TRANSIT

2 to 7 days

- Very fast transit, anywhere to anywhere
- Sophisticated track and trace
- Moves temperature sensitive and high value cargo safely

BEST FOR

Perishable and time sensitive cargo tied to a launch date.

NAVARO TIP

Air freight costs significantly more than any other mode. Use it when speed or spoilage is the real risk.

PLAN FOR THE YEAR

Plan for the year, every year

"If you fail to plan, you plan to fail."

Import export does not depend only on your country. It depends on factories in China, festivals in India and shipping cycles worldwide.

Chinese New Year

Late Jan to early Feb

Factories shut 2 to 4 weeks. Order 6 to 8 weeks ahead. Rates spike.

Golden Week

October 1 to 7

China closed. Blank sailings. Order before mid September.

Global peak season

Mid Aug to November

Capacity tightens worldwide. Book freight 4 to 6 weeks ahead.

Financial year close

March 31

Duty drawback and export incentive claims close. Settle documents early.

Diwali

October to November

Retail demand spikes. Stock must land 3 to 4 weeks before.

Holi

March

Colours, FMCG and gifting demand. North India led.

Regional festivals, fixed by region

Navratri / Durga Puja

Sep to Oct

Pongal

January

Baisakhi

April

Eid al-Fitr

Varies, Islamic calendar

Onam

Aug to Sep

Plan for your buyers' markets too.

WHY NAVARO IS FOR YOU

We exist so that you don't enter import export alone

Navaro's uniqueness is integration plus sequence.

Most solutions pick one slice: a course, a calculator, a freight service, an insurance product. Navaro is the only platform that owns the entire arc from "I don't know how trade works" to "I have shipped," and then keeps serving the trader through tools and finance. We move the user from complexity to clarity.

OPTIMIZE YOUR WORKFLOW

Start with the tools, the learning and the finance in one place.

THE COST OF NOT KNOWING

One minimum loss costs \$200. It is still more than the cost of learning.

What do you think Navaro is bringing to the stage?

What do you feel is missing in import export? Drop us an email and tell us.
